

PSTS is expanding to Adani Dhamra Port, Orissa.

A team of experts from PSTS travelled all the way to Orissa for loading of 219 H.R. Coils weighing about 24 m/tons each, a total weight of 5165.890 m/tons. The work at the port involved stacking at the yard, arranging to reload from the stack yard during the ship's call, feeding at the hook point, attending to the on-board stevedoring operations, placing proper dunnage and chocking and attending to the lashing. With the enthusiastic co-operation from ADANI team under the leadership of Mr. Sandeep Jaiswal, C.O.O. Adani Dhamra Port, the PSTS team made a success of the project.
