| Description       | : Integrated Logistics Management |

### PROJECT SCOPE

- Ship's Agency
- Port Operation
- Complete logistics from Factory to Port
- Intermediate Storage Service
- Customs Clearance
- Positioning of cargo alongside vessel
- Loading of Cargo on the vessel
- Securing of cargo on the vessel
- Export Forwarding

PSTS Logistics handled complete logistics management of the Wind Power Project from shipper's factory to port, followed by loading of cargo on the ship holds for its principals M/s Navalmar UK Ltd, an established vessel operator for break-bulk and project related cargoes.

PSTS moved more than 200 windmill blades of various lengths (37.6m to 44m), along with generators, towers, frames and other accessories of excessive odd sizes. PSTS has been handling regular shipments of similar shape and size for this client moving on the vessels managed by them.
