

61.2 M WIND TURBINE BLADES

first ever in India

PROJECT DETAILS

61.2m x 2.89m x 2.93m

Year : August, 2016
 Client : Navalmar, UK
 Project Type : Wind Power Generation
 Place of Origin : Dafeng, China
 Port of Discharge : Tuticorin, India
 Description : Ship Agency & Stevedoring

PROJECT SCOPE

- Ship's Agency
- Stevedoring

PSTS successfully handled wind turbine blades longest ever imported in India. Logistics movement of blades beyond the size of 47.5 m remains challenge in most Indian ports. When supplier approached us to check for feasibility of delivering 62.1m long turbine blades near Southern Indian state, PSTS was quick to propose Tuticorin Port as most ideal port in South East coastline with necessary facts & figures. PSTS was appointed to take care of ship agency and stevedoring operations to ensure safe under the hook delivery.
